

## The benefits and challenges for patients receiving chemotherapy in different settings

In **2023**, **Sciensus** conducted **research to understand patients'** chemotherapy experiences in different settings and identify factors influencing their choices. The findings will help address barriers to at-home chemotherapy and enhance service accessibility.

Notably, the research revealed that many patients receiving treatment in **clinics were open to at-home care** but were **unaware it was an option** before starting treatment.

**5 out of 6** Patients who received treatment at home ranked the quality of care as 5/6

## What role could Sciensus play?

We aim to **simplify** and **support** the chemotherapy experience to ease its burden, improve patient experience, and enhance quality of life during treatment. This research emphasises the need to **raise awareness** and help patients make informed decisions about their care options.

## Let's connect!

If you'd like to discuss referring your patients to receive cancer treatment at home, reach out to Sciensus at [private-enquires@sciensus.com](mailto:private-enquires@sciensus.com) or visit <https://www.sciensus.com/cancer-care>.
